

Viscose felt

Material:100% viscose fiber

Technology:non woven needle punched

Density:50gsm-7000gsm

Thickness:0.5mm-70mm

Content: 100% Viscose / Rayon Fibers

Introduction:

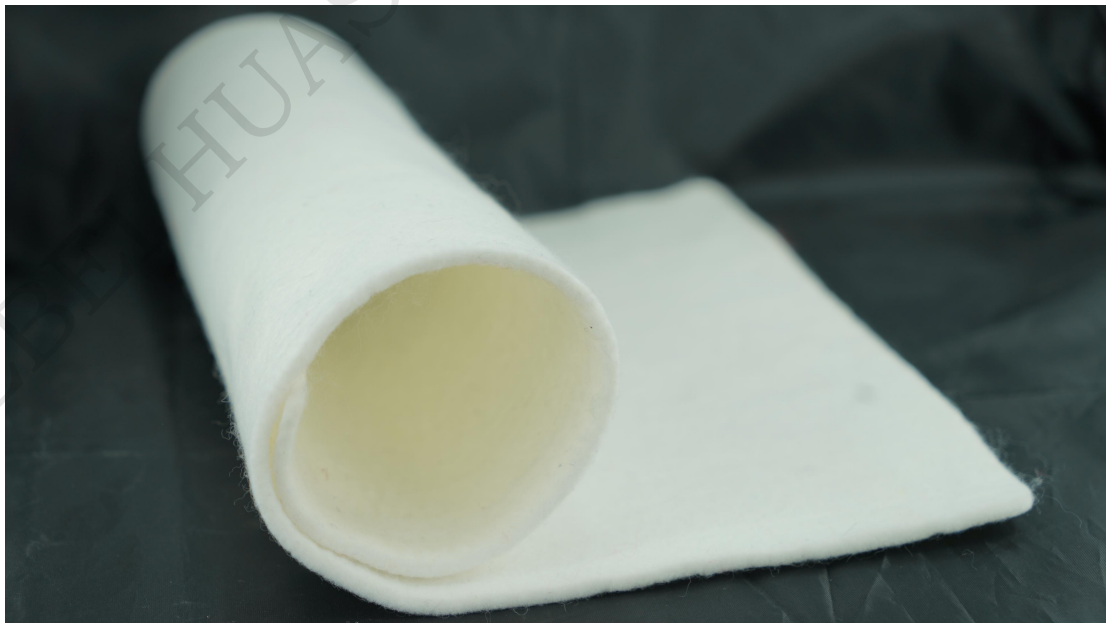

Our 100% Rayon/Viscose Felt is an organic material made from processed wood pulp and tinted with vegetable-based dyes. Rayon/Viscose Felt is durable yet breathable, lightweight, and absorbent. Plus, it drapes well and has a characteristically soft feel. These qualities make 100% Rayon/Viscose Felt ideal for achieving a soft yet stable texture in clothing, tablecloths, draperies, bedding, and all kinds of crafts.

Viscose felt is made of 100% viscose/rayon fibers. Viscose fibres are made from purified cellulose, which is derived from specially processed wood pulp. Viscose is highly absorbent, soft, and drapes well. Our 183 cm wide felt (72 inches) is folded in half to 91.5 cm (36 inches), then rolled to 70 meters long (77 yards) for packaging and shipping purposes. so some of its properties is very similar with cotton, such as good hygroscopicity, not easy to produce static electricity, has a better dyeing performance. It can degrade naturally. We also produce anti-flaming viscose felt in any size, it can be used as high temperature resistance material, it is the material of producing carbon felt and graphite felt, and used for High-speed rail seat packaging.

Advantage of viscose felt :

1. Professional manufacture.
2. Implement strict quality test & control procedure.
3. High quality & Best price.
4. Products could be customized.
5. Good after-sale service.
6. Fast delivery time.

Features:

- ◆ pure white, soft touch, particularly good elasticity, moisture permeability good.

Address: No.195,Xuefu Road,Xinhua District,Shijiazhuang,Hebei China

HEBEI HUASHENG FELT CO.,LTD

- ◆ using natural flame retardant fiber, and no melting drop phenomenon. With a permanent self-extinguishing effect. Dense carbide layer is formed
- ◆ burning. Carbon monoxide and carbon dioxide content is low, generating only a small amount of toxic fumes.
- ◆ stable acid resistance and alkali resistance, non-toxic, does not produce any chemical action. Natural degradation product, to comply with environmental protection.

Application:

Mainly used for clothing, footwear materials, various bags, ornaments, gift packaging, interior decoration, medical and health, locomotive and rolling stock manufacturing, instruments and meters, electronic appliances, power tools, computer supplies, printing equipment, CNC equipment, architectural decoration and other parts, it is also the base material for producing carbon felt and graphite felt.

- ◆ sofa bed mattresses and household textiles.
- ◆ transport, public places decorative fabrics.
- ◆ overalls, fireproof clothing, heat-resistant clothing lining.
- ◆ military and industrial outerwear, underwear.

Cleaning:

Dry clean only, hang dry and iron while still damp.

*Please note: Colors which appear online or in print may differ slightly from actual felt.

*This product meets the human-ecological requirements of the standard according to Oeko-Tex Standard 100.
