

Polyester Felt

Polyester fiber (abbreviated as PET fiber) is a synthetic fiber obtained by polyester spinning formed by the polycondensation of organic dibasic acid and dihydric alcohol. Polyester fiber is mainly made of polyethylene terephthalate.

Product Name	Polyester Felt
Material	100% Polyester
Thickness	0.5mm-70mm
Weight	40gsm-7000gsm
Width	maximum up to 3.3m
Length	50m/roll,100m/roll or customized
Color	Assorted color as the Pantone Color Card
Technics	Non woven needle punched
Certificate	CE, REACH, ISO9001, AZO

2.Features:

Durable, flexible, easy to deformation, corrosion resistance, insulation, crisp, easy to wash and quick-drying characteristics.

3.Application:

DIY craft, Wedding/Exhibition background, Christmas Ornaments, Coaster and place-mat, bags, shoes, bags, gifts package, interior decoration.
